

REF-sCOpe®

Video Inspection Scope

REF-sCOpe® Insightvision
is the new eyes
for your daily HVAC/R business

The new REFCO **REF-sCOpe**[®] Insightvision inspection camera is designed for the visual analysis of unreachable or hard to reach areas. The inspection camera is crucial for a clear, internal inspection of engines, A/C systems, interior structures of walls and other industrial and similar applications.

SIMPLE ONE TOUCH OPERATION KEEPS YOU FOCUSED ON THE JOB, NOT ON THE EQUIPMENT.

Optical imaging and illumination is provided by a full color image sensor and 6 LED lamps which are controlled by an on/off rotary switch.

The 3.5" full color LCD screen allows the user to observe live video from the remote camera. The 0.39" (10 mm) camera head with a semi-rigid cable makes it easy to detect the unreachable.

Specifications

Display	3.5" (8.9 cm) TFT digital panel (Resolution 320 x 240 pixel)
LCD backlight	LED
