

SUPER-Manifold-Set with «SNAP-ON» System

The first manifolds for all refrigerants.

These Manifolds offer an easier reading of each temperature scale. The unique «SNAP-ON»-System allows a quick change of the scales depending on the used refrigerant – no more mix-up of temperatures because there is always only one scale in use. As soon as new refrigerants appear on the market – only new scales have to be purchased. Even longer lifetime of REFCO-Manifolds. The Manifold is supplied including 8 different temperature scales for: R12, R22, R502, R134a, 404A, R407A, R407C, R507; each for low and high pressure.

Pressure scale:

M = metric, bar

DS = double scale bar/psi

KPA = kPa/psi

M2-3-SUPER

Manifold 2-Way

Complete in sturdy case, oil filled bellow type gauges diameter 80 mm, 3 pieces colour coded 1/4" SAE charging lines of 36 inches (90 cm) length, separate case with 8 pieces «SNAP-ON» temperature scales.

M2-3-DELUXE-M-SUPER

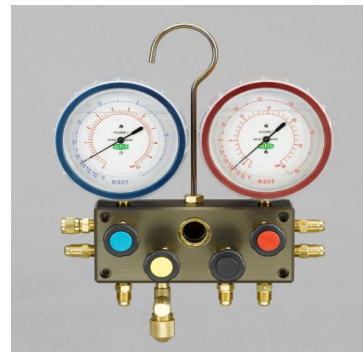

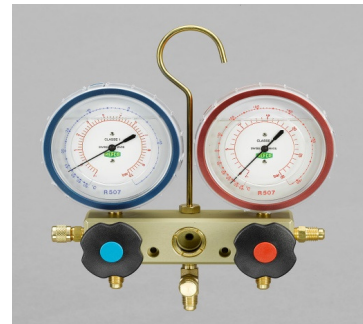

with gauges pressure scale M

M2-3-DELUXE-DS-SUPER

with gauges pressure scale DS

M2-3-DELUXE-KPA-SUPER

with gauges pressure scale kPa/psi

Part No.

9885055

9883661

M4-3-SUPER

Complete in sturdy case, oil filled bellow type gauges diameter 80 mm, 3 pieces colour coded 1/4" SAE charging lines of 36 inches (90 cm) length and one 3/8" SAE yellow vacuum line 36 inches (90 cm) length, separate case with 8 pieces «SNAP-ON» temperature scales.

M4-3-DELUXE-M-SUPER

with gauges pressure scale M

M4-3-DELUXE-DS-SUPER

with gauges pressure scale DS

M4-3-DELUXE-KPA-SUPER

with gauges pressure scale kPa/psi

Part No.
